

Steven Chen, PharmD, FCSHP, FNAP

Associate Dean for Clinical Affairs; William A. & Josephine A. Heeres Chair in Community Pharmacy; Prof. of Clinical Pharmacy, University of Southern California; Co-Chair, LA Region University of Best Practices

Dr. Chen has been an active leader in the Right Care Initiative since 2008. In addition to his roles as professor and dean, Dr. Chen is part of a team of USC faculty directing \$12 million grant-funded research, evaluating the impact of pharmacist-managed patient care services for underserved populations. Dr. Chen actively partners with the state of CA Department of Public Health in evolving the state laws and regulations on the practice of pharmacy. His current

clinical practice role includes the supervision of clinical and consultative pharmacy services to 19 safety net community clinics in Southern California. At these clinics, Dr. Chen oversees teams of clinical pharmacists, pharmacy residents, pharmacy students and pharmacy techs. Prior to joining the USC faculty in 1998, Dr. Chen provided administrative and clinical services to Cedars-Sinai Medical Group (CSMG) in Beverly Hills and served as a Faculty-in-Residence at Cedars Sinai Medical Center. From 1994-1998, Dr. Chen served as Clinical and Residency Coordinator at the VA Outpatient Clinic in Los Angeles. Prior to that, he helped develop the Ambulatory Care and Education Program at Sepulveda VA Medical Center also in Los Angeles. Dr. Chen's responsibilities include the provision of disease management and consultative services and coordination of clerkship students at several safety net clinics. Pharmacist-run disease management services provided include asthma, dyslipidemia, diabetes, hypertension, and heart failure. His lecture topics for the School of Pharmacy and postgraduate education include asthma/chronic obstructive pulmonary disease, arthritis, dyslipidemia, and other cardiovascular diseases. Chen received an honorary fellowship of the California Society of Health-System Pharmacists in 2000 and an honorary fellowship of the American Society of Health-System Pharmacists (ASHP) in 2001. He received the Best Practices Award from ASHP in 2002 and has NABP certification in dyslipidemia and asthma management. Dr. Chen has received 7 teaching awards from USC students and residents. In 2013, Dr. Chen was awarded the American Pharmacists Association Foundation Pinnacle Award for Individual Achievement.
